## CERTIFIED RETURN RECEIPT

7000 0520 0021 7582 9415

Mr. Lee Brown  
Magnesium Corporation of America  
238 North 2200 West  
Salt Lake City, Utah 84116

Re: Notification of Suspension of Operations, Magnesium Corporation Of America (MagCorp), Knolls Solar Ponds Project and the Rowley Project (Stansbury Basin Facilities), M/045/022 & M/045/008), Tooele County, Utah

Dear Mr. Brown:

In accordance with the provisions of Rule R647-4-117, the Division hereby requests information from MagCorp regarding its plans for continued operations at the Knolls Solar Ponds and Rowley Project areas. According to R647-4-117.2, when mining operations are terminated or suspended for a period of two years, ***or are expected to exceed this time frame (emphasis added)***, the operator shall, upon request, furnish information to the Division as it may require to evaluate the status of the mining operation, the compliance with the rules, and the probable future status of the land affected.

Our annual report records indicate that operations at the Knolls facilities were last active in 1999. Mining operations at the Rowley project area were last active in 1996. As a result of information received during more recent discussions with MagCorp representatives, the receipt of annual report information, and subsequent notification of a Chapter 11 bankruptcy filing, we believe it is timely to provide supplemental information regarding MagCorp's plans for continued suspension, termination, reclamation, and/or reactivation of mining operations at these permitted sites.

If reclamation is proposed for either of these sites, the Division welcomes the receipt of updated, detailed reclamation proposals (and cost estimates) that are tied to the existing site conditions. This information would help clarify the generic reclamation descriptions provided in the reclamation plans currently on file.
